

# PROVIDER ALERT

Page 1 of 1

## Peer Sharing Webinar

Small practices and independent physicians associations (IPAs) have made remarkable progress implementing and expanding telehealth in a very short time frame, providing critical care to their patients. To support these providers as they adopt virtual care, the California Quality Collaborative (CQC) is currently hosting bi-weekly webinars, including sessions with peers sharing telehealth implementation experience, lessons from a successful "virtual-first" primary care practice and billing guidance for submitting telehealth and virtual care claims.

The following additional webinar is being offered this month:

Patient Engagement and Virtual Care, featuring University of California San Francisco's (UCSF's) Center for Vulnerable Populations and Patient Family Centered Care Partners (PFCC) partners, May 29, Noon PT.
